Help people find their nearest testing
centre!

testfinder.info

With the ongoing crisis in Ukraine it is especially important to have your site on the new [European Test Finder](#) to help displaced people find their nearest testing site to

receive not only testing but also other supportive services.

Additionally, the ETF is in the process of being expanded to include information about sites that offer HIV treatment, testing and treatment for tuberculosis, opioid substitution therapy with future plans to also include hepatitis treatment sites. This is a result of a collaboration with the WHO Regional Office for Europe which aims to **ensure continued provision of treatment for Ukrainians displaced by the conflict**. Initially, information will be available for Ukraine's neighbouring countries, but we are hoping to expand to all other European countries.
