**Spring European Testing Week: 20-27 May 2024**

This year, the Spring edition of European Testing Week will take place from **Monday 20 May to Monday 27 May**. As usual, we hope that civil society organisations, healthcare institutions, government bodies, educational facilities and others will help promote testing for HIV, hepatitis and STIs in various ways during the week.

If your organization or institution is planning to participate, please make sure to sign up on our website to show that you support the campaign and its objectives to ensure early diagnosis and access to treatment for all.

## HepHIV2023 Madrid Conference

Videos of the presentations made at the HepHIV2023 Madrid Conference (organized by EuroTEST) are now available at the website.

Please use [this link](#) to find presentation videos and slides.

HepHIV 2023 videos & presentations

An illustration on a light blue background showing a person from behind, wearing a dark blue t-shirt and light-colored pants. To the right of the person is a large, stylized syringe. The background also features abstract shapes, including a cluster of white dots and various teal-colored organic shapes.

**Webinar: Introduction to the 2023 ECDC-EMCDDA guidance on preventing and controlling infectious diseases among people who inject drugs**

**13 March, 15:00-16:00 CET**

## **Upcoming webinar: Introduction to the 2023 ECDC-EMCDDA guidance on preventing and controlling infectious diseases among people who inject drugs**

On 13 March 15:00-16:00 CET, the European Centre of Disease Prevention and Control (ECDC), European AIDS Clinical Society (EACS) and Centre of Excellence for Health, Immunity and Infections (CHIP) are hosting a webinar to introduce the updated ECDC-European Monitoring Centre for Drugs and Drug Addiction (ECDC-EMCDDA) [guidance on preventing and controlling infectious diseases among people who inject drugs](#).

This webinar is open for all to attend, but targeted towards policymakers and public health/social programmers responsible for developing national strategies, policies, and programmes; public health and health professionals working with people who inject drugs; and representatives from civil society organisations and the community.

[Register to attend here](#).

# Break the silence around hepatitis stigma and discrimination.

Please take this survey

## Please help disseminate the world's first hepatitis stigma survey!

World Hepatitis Alliance (WHA) and European Centre for Disease Prevention and Control (ECDC) are piloting the world's first ever survey to understand the stigma and discrimination experienced by people living with hepatitis B and C. A world without hepatitis is within our reach – but we can't let stigma and discrimination stand in our way. Stigma, often caused by misunderstandings about how hepatitis is transmitted, can drastically affect people's lives and mental health. Discrimination against people living with hepatitis also frequently impacts their right to work, study and travel.

Please help disseminate the survey among people living with or cured of hepatitis C and/or living with hepatitis B. For more information and for links to the survey in different languages, please go to: <https://www.worldhepatitisalliance.org/stigma/>
